After reviewing Paragraph 8(c) of the Protective Order (Filing No. [390](#)), it appears the co-defendants are precluded from access to the information relied upon by Prism's expert in his report. It is inherently unreasonable to allow plaintiff access to information that defendants cannot access. Accordingly,

IT IS ORDERED that either the Protective Order shall be revised, or the designated information must be stricken from plaintiff's expert reports.

DATED this 2nd day of July, 2012.
